

Woodland Works

A collection of home office inspirations from Woodland Cabinetry.

As we adjust to our "new normal", we see monumental shifts in human and societal behavior. None may be more noticeable than the "Work from Home" movement. As more CEOs and industry leaders see that their employees can thrive in an at-home work environment, it is important to help service the needs of the "new" workforce.

We've compiled a variety of home office layouts that can be designed using Woodland's standard cabinetry, and included detailed renderings and perspectives for each design to make it easy to promote, customize and sell. For more information, please contact your Woodland Cabinetry representative or log on to our website.

**Note that all cabinet lines and all files are available on the dealer login portion of our website.*
